

Cornice Failure

Date

Wed, 01/15/2025 - 12:40

Activity

Skiing

Saw cracking of cornices on the ridgeline NE of Mount Blackmore. Just a little nudge released a significant portion. A good reminder to give cornices room above and below.

Other than that, it was a beautiful day of skiing with sun, moderate temps, and pow. ?

Region

Northern Gallatin

Observer Name

Shep
