

Mar 7 obs: "...There was 6" of low density snow from yesterday. Winds were stronger than expected, from the north at the top of the Throne, and increased through the morning.... We found fresh drifts that were reactive, cracking easily and 5-10' wide out from our skis, on south and east facing slopes around 8000-8300'." Photo: GNFAC

Advisory Region Bridger Range Longitude -110.95W Latitude 45.88N

Avalanche Details: Fresh reactive wind slabs N. Bridgers
